# PLATINA 4MM CATTLE FEED

- This cattle feed is specially formulated with bypass fat and bypass protein to provide exceptional results. These ingredients are added in specific quantities to ensure that the feed is nutritionally balanced and can enhance the overall health and productivity of cattle. With the right blend of bypass fat and bypass protein, this feed can help you achieve superior results from your livestock.
- This cattle feed is specifically designed for cows and buffaloes that produce high quantities of milk, with a capacity of producing 10 liter or more.

**Crude protein: 22% min**

**Crude fat: 4% min**

**Crude fiber: 10% max**

**Sand Silica: 4% max**

# DAIRY GOLD CATTLE FEED

"If you care about the health of your dairy animals, then how can you deny the importance of dairygold cattle feed?"

- This cattle feed has been formulated keeping in mind the health and milk production of your animals. Its quality and composition are carefully maintained to ensure that the cost of milk production does not become too high for the farmer. Therefore, this feed is a cost-effective solution for dairy farmers who want to keep their animals healthy and productive while keeping their expenses in check.
- Additionally, this feed also includes vitamins, minerals, and other essential nutrients that are necessary for the overall health and well-being of your animals. This ensures that your cattle receive a balanced diet and all the necessary nutrients to meet their dietary requirements.

**Crude protein: 20% min**

**Crude fat: 3% min**

**Crude fiber: 10% max**

**Sand Silica: 4% max**

# SILVER SKY CATTLE FEED

- This animal feed is available at an affordable price.
- This animal feed is made for low milk yield or average animals, and it fulfils their basic nutritional requirements, preventing any deficiencies of minerals, vitamins, and calcium in their bodies.

**Crude Protein: 18 % min**

**Crude Fat: 2 % min**

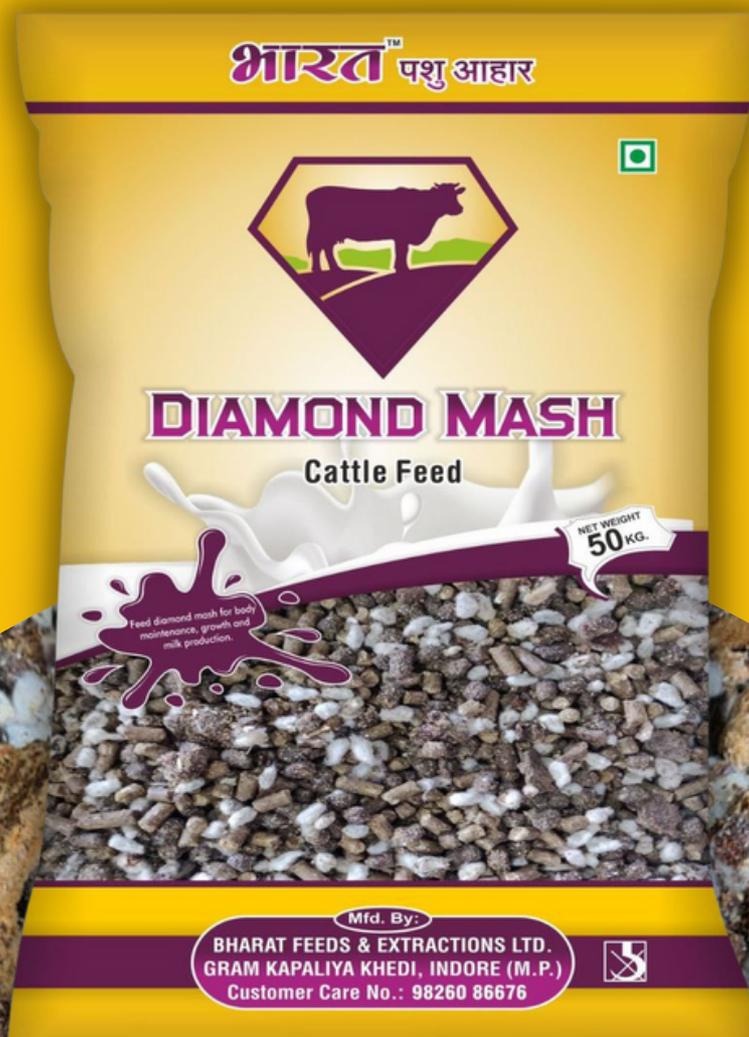

**Crude Fiber: 11 % max**

**Sand Silica: 5 % max**

# DIAMOND MASH

Our cattle feed contains a unique blend of ingredients, including wheat bran, pellets, molasses, various grains like maize, cottonseed, cottonseed meal cake, groundnut meal cake, and mustard oil cake. Each ingredient is carefully selected to provide your cattle with a complete and balanced diet that meets their nutritional needs.

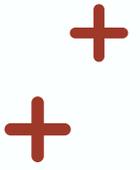

# EMERALD MASH

- This animal feed is made to mix with your main animal feed, which can help reduce the cost of milk production.
- This feed not only reduces the cost of milk production but also improves the overall health of the animal.

# DAIRY SILVER CALF STARTER

- Introducing Dairy Silver - the ultimate solution to provide your calves with complete and balanced nutrition in the form of pellets. Our compound feed is specially formulated to meet the nutritional requirements of young calves during their critical growing phase. Each pellet contains a perfect blend of essential nutrients including protein, fiber, vitamins, and minerals to support optimal health and development.
- Dairy Silver is made from the finest quality ingredients, carefully selected and processed to ensure maximum nutrient retention. Our pellets are easy to digest and promote healthy rumen development, helping to prevent digestive disorders and support optimal growth.

# PLATINA GOAT & SHEEP FEED

- Our compound goat feed pellets are specially formulated to provide your goats with a balanced and complete nutrition. Made with high-quality ingredients, including grains, protein sources, and essential vitamins and minerals, our pellets are designed to support the growth and maintenance of healthy goats.
- Whether you have dairy goats or meat goats, our specially designed feed is an excellent choice for promoting weight gain and milk production. Try our feed today and see the difference in your goats' health and productivity.

**Crude protein: 20% min**

**Crude fat: 4% min**

**Crude fiber: 10% max**

**Sand Silica: 4% max**

# SOYA HUSK PELLETS

---

- Soya husk pellets are a type of feed supplement for cattle that are made from the outer shells or husks of soybeans. Soybean husks are a byproduct of the soybean oil extraction process and are rich in fiber, protein, and minerals.
- Soya husk pellets are typically used as a source of roughage or fiber in the diet of cattle. They are a low-cost alternative to traditional roughage sources such as hay or silage and can be used to supplement or replace these feed sources.
- Soya husk pellets can also be a source of protein, although the protein content is lower than other protein supplements such as soybean meal. However, the fiber content in soya husk pellets can help promote good digestive health in cattle by stimulating rumen activity and preventing digestive disorders such as acidosis.
- Soya husk pellets are often used in the diets of dairy cows, beef cattle, and other ruminants to improve their overall health and productivity.

**Crude protein: 12–13%**

**Crude fat: 1–3%**

**Crude fiber: 50–60%**

**Moisture: 13% max**

# GRINDED MAIZE 3MM

---

- Introducing our high-quality grinded maize, specially designed to provide the essential nutrients and energy required for the healthy growth of cattle. Our maize is expertly ground to a size of 3mm, making it easy for cattle to digest and absorb the nutrients. It is a rich source of carbohydrates, protein, and fiber, Our maize is carefully sourced from trusted farmers and undergoes rigorous quality checks to ensure that only the best reaches our customers. Add our grinded maize to your cattle feed and see the difference in their health and productivity!

**Crude protein: 9%**

**Crude fat: 3%**

**Crude fiber: 2%**

**Moisture: 13% max**

# MINERAL BOOSTER

## Benefits of Bharat Feed's Mineral Mixtures :-

- Disease prevention, high development, and milk production
- Healthy animals and healthy calves.
- High formation of strong bones.

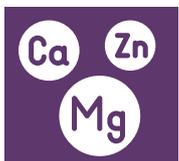

## Features and Details :-

- Chelated minerals of premium quality
- High reproductive capacity.
- Helps in the formation of strong bones in growing young animals.
- High development and milk production.
- Feeding it in the right amount enhances the reproductive capacity in animals and ensures proper timing of delivery in the offspring
- This product is a premium quality balanced mix of minerals and vitamins for cows, buffaloes, goats, horses, and other domestic animals. It improves growth, fat deposition, reproductive capacity, milk production, and also enhances reproductive health and helps maintain pregnancy in animals.
- We recommend feeding your animals Bharat Feed's Mineral Booster for maximum milk production and good health.

## THIS MIX CONTAINS VARIOUS TYPES OF VITAMINS AND MINERALS.

- Vitamin A
- Vitamin D
- Vitamin E
- Calcium
- Phosphorus
- Copper
- Zinc
- Manganese
- Iodine
- Chromium
- Fluorine

KIDS/LAMBS	UPTO 12KG	100 GRAMS	25KG/50 KG (BOPP)
ADULT SHEEP/GOAT	12 TO 30 KG	200 GRAMS	
	30 TO 50 KG	300 GRAMS	
	ABOVE 50 KG	400 GRAMS	

# RAW MATERIALS

## COTTON SEED

COTTON SEED

Cottonseed as supplement is marketed primarily towards agricultural sectors that feed dairy cows.

Whole cottonseed leads to high production of milk and fat when fed to a high-producing dairy cow.

It serves as a highly digestible feed which also improves the reproductive performance in livestock.

## COTTON SEED CAKE

COTTON SEED CAKE

When kapas is ginned, the lint and seed get separated. When cottonseed is crushed for the extraction of oil, the by-product which remains after extraction of oil is called CottonSeed Oil Cake or Kapasia Khali in Hindi. This is mainly used as cattle feed.

Our cottonseed oil cake contains a large amount of protein, oil which makes it highly desirable for animal feeds

# RAW MATERIALS

## CORN/MAIZE

CORN/MAIZE

The corn/maize grain is a major feed grain and a standard component of livestock diets where it is used as a source of energy. Other grains are typically compared to maize when their nutritional value is estimated.

"Dent corn" maize is the most widely grown type of maize and the one typically used for feed.

## CO FEED/MAIZE BRAN

CO FEED/MAIZE BRAN

Corn/maize bran theoretically consists of the bran coating removed in the early stages of processing, the corn/maize bran sold for livestock feeding is usually a mixture of the bran fraction and other by-products and is, therefore, a very loosely defined product of highly variable composition.

## CORN/MAIZE CAKE

CORN/MAIZE CAKE

Corn/Maize Cake is very rich in nutrition and provides the cattle with the required amount of proteins for their everyday diet. These cakes also have calcium, dietary fiber, and various other nutrients that help increase milk yield.

It is free from chemicals/pesticides or any additives; this helps in boosting overall health and immunity of the cattle.

## CORN/MAIZE GLUTEN

CORN/MAIZE GLUTEN

Corn gluten is a feed ingredient mostly used in cattle diets as a source of energy and protein.

Corn gluten feed is the by-product of the wet-milling of maize grain for starch production. Corn gluten feed consists mainly of maize bran and maize steep liquor (liquid separated after steeping). Our dried corn gluten feed is traded worldwide.

## DE-OILED RICE BRAN

DE-OILED RICE BRAN

De-Oiled Rice Bran (DORB) is the key to wholesome development of livestock. After crude oil has been extracted from rice bran, DORB is obtained.

Bharat Feeds supplies extremely rich and premium quality de-oiled rice bran which is ideal for making cattle and poultry feed.

## WHEATBRAN

WHEAT BRAN

Wheat bran, a by-product of the dry milling of common wheat into flour, is one of the major agro-industrial by-products used in animal feeding. It consists of the outer layers (cuticle, pericarp and seedcoat) combined with small amounts of starchy endosperm of the wheat kernel.

# ABOUT US

---

As a leading Cattle Feed producer in India, with a production capacity of 500 MT of cattle feed per day, Bharat Feed & Extractions Limited was established in the year 1995. We are a manufacturer of Cattle Feeds, who believes in quality delivery at the right time and place. Moreover, The food is specially prepared for buffaloes & cows considering their high level of fat and protein requirements.

Additionally, This Feed is prepared according to the standards given by the Indian Government. We have achieved the leadership with our core values of caring, teamwork, and producing quality products because we believe 'Quality speaks itself. We are having an ultra-modern laboratory, research and development, and quality control department on our premises.

The raw materials for the manufacturing of finished products are procured from the non-polluted and healthy suburban areas. We focus mainly on customer satisfaction and follow sound business policies and transparent transactions to become an ideal sourcing destination for all kinds of animal feeding products. We conduct a variety of quality checks to offer clients the most attractive offers and decent deals.

# QUALITY & STANDARDS

---

**Our firm is committed to producing high-quality, nutritious feed that promotes the health and well-being of livestock. At Bharat Feeds & Extractions Ltd., we place utmost importance on maintaining stringent quality control measures throughout our manufacturing processes.**

**Raw Material Selection:** We understand that the quality of our feed begins with the selection of superior raw materials. Our team of experts rigorously evaluates and procures only the finest quality ingredients from trusted and reliable suppliers. This ensures that the raw materials used in our manufacturing process meet the required standards and contribute to the overall nutritional value of our feed.

**Manufacturing Process:** Bharat Feeds & Extractions Ltd. follows a carefully designed manufacturing process that adheres to international quality standards. Our state-of-the-art facilities are equipped with advanced fully automatic machinery and technology, ensuring efficient production while maintaining strict quality control.

**Quality Assurance:** To guarantee the highest quality standards, we have implemented a comprehensive quality assurance program. Our quality control team conducts regular inspections and tests at various stages of production to assess the quality, safety, and nutritional content of our feed. This includes analysis of ingredient composition, moisture content, particle size, and microbiological parameters. Any product that fails to meet our rigorous quality standards is promptly identified and addressed.

**Continuous Improvement:** At Bharat Feeds & Extractions Ltd., we believe in constantly improving our processes to enhance the quality of our feed. We actively seek feedback from customers, conduct internal audits, and stay updated with the latest advancements in the industry. By continuously refining our manufacturing techniques and investing in research and development, we ensure that our feed remains at the forefront of quality and nutrition.
